F500 - Stackable Fusing Foot Rings - 2 Pack Refill

**This Refill Package Contains 2 Sets of Stackable Fusing Foot Rings
 Add a Stemmed Foot to Two Different Drape Bowls**

Package contains:

- **2 Sets of Stackable Fusing Foot Rings**
- **Information Card with instructions on how to use the stackable rings to add a foot to a draped bowl.**

The 'Starfire Bowl with Stem Foot' process is simple:

- Create a 10" to 12" (25 to 31 cm) diameter flat-disk design then fuse it to your desired fusing level.
- Cast a 3-1/4" (85 mm) x 1/4" (6 mm) glass disk in the C105 Foot Casting Mold using 90 grams of leftover scrap glass pieces from your project.
- Stack one set of F500 Foot Rings to create the 'V' shaped cone assembly. These precision cut, reinforced rings will retain their thickness and shape throughout the drape firing process.
- Place your pre-fused flat-disk on the M35 Starfire mold, then center the Foot Ring cone assembly and stack the Cast Foot disk on top of the cone.
- Set the kiln to the recommended drape fire schedule (on the instruction card) to shape the bowl, create the stemmed foot profile and fuse the foot - all in the same firing.

**Suggested retail price: \$19.95 (US)
 In Stock and Available Now**

Sample Bowl with Stemmed Foot (Rings shown on inset)

Foot Rings must be cut and discarded after one use
