# S205 BinaSphere Cast-Slump Mold

*It's Two Molds in One - Create a Footed Bowl or a Footed Platter*

One side of the BinaSphere Mold produces a true spherical-shaped bowl with a cookie-style foot that is remarkably similar to vessels made by master glass blowers. The opposite side of the BinaSphere Mold produces a flat serving platter that is elevated 5/8" (16 mm) on a cast glass foot.

## BinaSphere Mold Process Overview

The Binasphere Mold enables users to create either a footed bowl or a footed platter using only this mold - plus fusing glass and mold release. Here's the three-step process.

1. The first step is to cast a glass foot disk directly in the foot casting reservoir of the BinaSphere Mold, using scrap glass shards or glass frit.
2. Then design and fuse a 12" (30.5 cm) diameter flat object disk. This could be a single layer 12" (30.5 cm) disk with fused design elements or create a two layer, full-fused design disk, or simply cut a 12" (30.5 cm) circle from a compelling piece of fusible art glass and let the design in the glass and the foot on the bottom, be the star.
3. The final step is to slump the object disk into the Binasphere Mold to shape either the bowl or the platter while at the same time attaching the cast glass foot by fusing it to the underside.

**Note:** Kiln chamber must be minimum 13" diameter by 6" deep.

## Mold Package Contains:

- S205 BinaSphere Cast-Slump Mold
- 4 page Instructional Booklet
- Weblink to access 2 eProjects with Video

Astral Platter with Foot  
11 1/2" (29 cm) x 1 1/2" (4 cm) high

Hot Fritage Bowl with Foot  
11 1/4" (28.5 cm) x 2 1/2" (6 cm) high

Sedona Platter with Foot  
11 1/2" (29 cm) x 1 1/2" (4 cm) high

**The BinaSphere Mold is now in Full Distribution**
